Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The feature of a cylindrical classifier with indents on the circumferential edges of different sizes, wherein the contact surfaces of the classifier contacting the silicon impart no or low surface contamination renders the invention novel and non-obvious over the prior art. The closest prior art teaches a cylindrical screen coated to minimize contact contamination during sorting of silicon (Dumler et al., US 5,165,548). However, no motivation can be found in the prior art to modify the Dumler cylinder into the claimed indent classifier or to coat or make the prior art cylindrical indent sorters with contact surfaces that minimize contact contamination while sorting silicon pieces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
